Abstracts

The global Offshore Cable Lay Equipment market size is predicted to grow from US$ 409 million in 2025 to US$ 708 million in 2032; it is expected to grow at a CAGR of 7.9% from 2026 to 2032.

Cable Lay Equipment refers to specialised equipment, modules and integrated mission systems installed on or mobilised with cable-laying vessels, offshore construction vessels, barges, temporary vessel conversions and shore-to-vessel loading spreads for the loading, storage, pulling, routing, tension control, speed control, bend-radius protection, overboarding, laying, recovery, repair and re-laying of subsea power cables, offshore wind inter-array cables, export cables, HVDC subsea interconnectors, submarine telecom cables and related offshore cables.

From a supply-side perspective, Europe remains the global centre of gravity for Cable Lay Equipment, especially the North Sea supply chain across the United Kingdom, the Netherlands, Denmark and Norway. This reflects decades of accumulated capability in offshore oil and gas SURF equipment, submarine telecom cable operations, offshore wind installation and subsea interconnector projects. The regional supply base includes integrated system providers, deck equipment manufacturers, dedicated cable engine and tensioner specialists, carousel suppliers and rental-based cable handling spread owners.

Demand growth is primarily driven by offshore wind, but the addressable equipment market is also supported by HVDC subsea interconnectors, offshore wind export cables, submarine telecom cables, cable repair and recovery, vessel conversion and modular spread rental. The IEA expects global offshore wind capacity expansion to reach about 140GW over 2025–2030, with annual offshore wind additions rising from 9.2GW in 2024

to more than 37GW by 2030; China and Europe are expected to account for a large share of the expansion. This trajectory supports continued demand for cable-lay vessels, cable-lay spreads, carousels, tensioners and cable engines.

United States market for Offshore Cable Lay Equipment is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Offshore Cable Lay Equipment is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Offshore Cable Lay Equipment is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key Offshore Cable Lay Equipment players cover NOV Inc, Royal IHC, Huisman Equipment B.V., Maritime Developments Ltd, MacArtney A/S, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.
