## Abstracts

The global Oil and Grease Resistant Papers market size is predicted to grow from US\$ 1009 million in 2025 to US\$ 1324 million in 2032; it is expected to grow at a CAGR of 4.0% from 2026 to 2032.

Oil and Grease Resistant Papers are specially treated papers designed to repel oils and greases, making them ideal for food packaging, serving, and various industrial applications. These papers often undergo a process that applies a hydrophobic coating or uses a pulp composition that minimizes absorption, ensuring that oils do not penetrate the paper. This resistance helps maintain the integrity of the packaging, prevents contamination of the contents, and enhances the overall durability of the paper in demanding environments. Common uses include fast-food wrappers, bakery bags, and food service liners, where maintaining freshness and cleanliness is paramount. Oil and Grease Resistant Papers sell for about \$1,800 to \$2,200 per ton.

The oil and grease-resistant paper market is experiencing significant momentum, fueled by the increasing demand for sustainable and efficient packaging solutions across a variety of industries. As environmental concerns become more pronounced, companies are seeking alternatives to conventional plastic-based packaging, turning to oil and grease-resistant papers for their ability to provide effective barriers against oils and liquids without compromising environmental responsibility. These papers are especially popular in the food industry, where they are used for wrapping greasy items like burgers, fries, and baked goods, offering convenience and functionality while being recyclable or biodegradable. The growing focus on reducing plastic waste is pushing innovation within this market, with advancements in coatings and production techniques that enhance performance while maintaining eco-friendly attributes. As consumer preferences shift toward more sustainable packaging, the market for oil and grease-

resistant papers is poised for continued expansion, with strong potential in both foodservice and retail sectors.
