Bio-solvents are used in oilfield operation during enhanced oil recovery processes as well as cleaners for oilfield equipment. Application of biocides in oilfield activities include its injection during oil recovery, fracking, drilling, pit treatment, and others. In the oilfield activities and especially during drilling and oil recovery, microorganisms can have a severe impact on the oil recovery process due to microbial corrosion of the equipment

and the piping systems and by formation of bio-films on the walls of storage tanks, on the filters and valves. Thus, plugging the flow and causing degradation of the oilfield chemicals being used and corrosion of the pipes. Biocides are used to kill these microorganisms to prevent these situations.
