OLED Electronic Viewfinder is a photographic equipment accessory that combines electronic technology and OLED display technology to provide photographers with a clear and bright image composition and preview tool. The OLED (Organic Light Emitting Diode) screen is the core part of the electronic viewfinder, responsible for displaying the image captured by the camera lens. The OLED screen provides photographers with high-quality image previews with its high contrast and bright color performance.

As a leader in the camera and camcorder market, Sony is at the forefront of OLED EVF technology. Canon has also adopted OLED EVF technology in its high-end cameras and camcorders. As technology develops, the resolution of OLED EVF is gradually increasing, from Full HD to 4K and even higher resolution. The OLED Electronic Viewfinder market is a technology-driven high-end market that is expected to continue to grow and expand its application areas as photography and video technology continue to advance.
