The report requires updating with new data and is sent in 48 hours after order is placed.

The On-grid system is connected with utility grid (like BESCOM in Bangalore) and this system would work only if the grid is available. In case of a power cut, the system will not work and hence the On-grid system is also termed as a Grid-tied system. Grid is required since the inverter needs to be provided a reference voltage and the inverter needs to sync with the grid in order to export energy back into the grid.
