A digital replacement for a paper notebook to document and record data, samples, and experimental work. An ELN is a software tool that can be either on-prem or cloud-based. Information can be unstructured or structured work. Data or images in various formats can be imported into entries. Oftentimes, used to document genomic or proteomic sequences, protocols, recipes, experimental observations or conclusions and process workflows. Tables can be created within entries to organize information or create a checklist of tasks or steps to perform. Security of the information is critical and should be carefully considered when selecting an ELN to protect and store valuable information. An ELN may be a stand alone or more effectively be part of a LIMS or LES platform.
