Abstracts

The global Onium Salt Condensation Reagent market size is predicted to grow from US\$ 195 million in 2025 to US\$ 272 million in 2032; it is expected to grow at a CAGR of 5.0% from 2026 to 2032.

In the development of peptide synthesis reagents, the onium salt condensing agents derived from HOBt and HOAt (represented by phosphorus cationic condensation reagents and urea cationic condensation reagents), both in terms of reactivity and product yield Performance and purity are superior to other types of condensing agents.

Amide bond is the basic structure of peptide drugs and many small molecule chemical drugs, and peptide synthesis reagents play a crucial role in amide bond synthesis. According to statistics, in 2021, the proportion of drugs containing amide bonds among the top 200 drugs in global sales will be more than 66.5%. The continuous listing of new varieties of downstream peptide drugs and growing end-use demand (Novo Nordisk's simeglutide's global sales in 2022 exceeded \$10 billion) will push the global peptide synthesis reagent market space to further expand.
