The global Online Gambling Game Software market size is predicted to grow from US\$ 69560 million in 2025 to US\$ 74460 million in 2031; it is expected to grow at a CAGR of 1.1% from 2025 to 2031.

Online gambling (or Internet gambling) is any form of gambling conducted on the Internet. This includes virtual poker, casinos and sports betting. Online gambling game software is a complete solution for managing any gaming business across multiple channels and products. Features include player account management, payment processing, bonus, loyalty program, fraud and risk prevention, including game management for the recommendation engine and powerful analytics. The complete platform is built in modularity or can be deployed separately.

The online gambling game software is essentially an online gambling platform. In contrast to face-to-face casino gambling, online gambling has no bookmakers and is managed by casino gaming software.

Currently, major manufacturers in the global market include International Game Technology (IGT), Playtech, Microgaming, Betconstruct, Softgamings, etc.

The production area is distributed in North America, Europe, China and Israel. Europe accounted for about 54% of the global market in 2019.

From the perspective of product type and technology, the online gambling game software market can be divided into the following categories: online casino, sports

betting, esports betting, online lottery, and others. In 2019, sports betting accounted for about 21% of the global market, followed by online casinos with about 20% of the market share.

From the perspective of product market application, the main application areas of online gambling game software are desktop and webpages and mobile installation. These two types had similar market shares, about 54% and 46% respectively in 2019.
