Abstracts

The global Online Laundry Services market size is predicted to grow from US$ 39010 million in 2025 to US$ 98710 million in 2031; it is expected to grow at a CAGR of 16.7% from 2025 to 2031.

Online laundry service refers to the use of Internet technology and platforms to bring the traditional laundry service process online, providing users with convenient and efficient clothing cleaning solutions. Users can make an appointment for laundry service through a mobile phone APP or website, including selecting the type of laundry, washing method, pick-up and delivery time, etc., and then wait for professionals to pick up the items at home and return them after washing.

In recent years, with consumers' pursuit of quality of life and the popularization of Internet technology, the scale of the online laundry service market has continued to expand. The annual operating income of China's laundry industry continues to grow, among which daily clothing laundry services account for a large proportion of the industry's annual revenue. It is expected that the scale of the online laundry service market will continue to grow rapidly in the next few years. The scale of online laundry users has increased year by year, showing great growth potential. These users are mainly concentrated in young, highly educated, and high-income urban residents.
