The global Online Lithium-ion Battery X-ray Inspection Equipment market size is predicted to grow from US\$ 201 million in 2025 to US\$ 490 million in 2032; it is expected to grow at a CAGR of 13.8% from 2026 to 2032.

The continuous support of government policies has brought steady growth momentum to the market. Many countries have set the time for the shutdown of fuel vehicles, and there is huge room for growth in the electric vehicle market in the future. In recent years, the world's major automobile powers have stepped up strategic planning and policy support. Multinational automobile companies have increased R&D investment and improved their industrial layout. New energy vehicles have become the main direction of the transformation and development of the global automobile industry and an important engine for the continued growth of the world economy.

As people's demand for energy consumption continues to grow, in order to rationally use energy and improve energy utilization, an energy storage system is required to collect and store the excess energy temporarily used for a period of time in some way, and then extract it at peak usage use. Moreover, the use of clean energy such as wind energy and solar energy is increasing in a large amount, and at the same time, it is facing the problem of its inability to continue power supply, so the demand for energy storage is further increased. The existing energy storage systems are mainly divided into five categories: mechanical energy storage, electrical energy storage, electrochemical energy storage, thermal energy storage and chemical energy storage. At present, the world's highest proportion is pumped water storage, followed by compressed air storage. Although the overall scale of electrochemical energy storage is small, it is developing very rapidly. Electrochemical Energy Storage System mainly includes Lithium Battery and Lead Acid Battery and other types. Lithium Battery type

occupies the main market share accounting for 96.22% of the total global market in 2022.
