An Online Novel Reading App is a digital platform designed to provide users with access to a vast library of novels and other literary works directly on their electronic devices such as smartphones, tablets, or computers. These apps often offer features such as customizable reading experiences, bookmarking, offline reading, and user reviews. They cater to a wide range of genres and reader preferences, making literature more accessible and convenient. Many apps also include interactive elements, such as comment sections or community forums, allowing readers to connect and engage with each other. The convenience of having a portable library and the ability to discover new authors and genres easily makes these apps increasingly popular among avid readers.

The global Online Novel Reading App market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
