The report requires updating with new data and is sent in 48 hours after order is placed.

The global Online Programming Learning market size is projected to grow from US$ 503.8 million in 2023 to US$ 862.7 million in 2030; it is expected to grow at a CAGR of 8.0% from 2024 to 2030.

LPI (LP Information)' newest research report, the “Online Programming Learning Industry Forecast” looks at past sales and reviews total world Online Programming Learning sales in 2023, providing a comprehensive analysis by region and market sector of projected Online Programming Learning sales for 2024 through 2030. With Online Programming Learning sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Online Programming Learning industry.

This Insight Report provides a comprehensive analysis of the global Online Programming Learning landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Online Programming Learning portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Online Programming Learning market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Online Programming Learning and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-

up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Online Programming Learning.

According to World Bank statistics, the global birth rate in 2021 will be about 1.7%. Although the population growth rate has slowed down, with the development of the world economy and the continuous increase of per capita disposable income of residents, the consumption capacity of residents has also increased. Therefore, there is still a large room for development in the scale of the infant and young child market. China has a large population base, and even if the population growth rate slows down, there will still be a demographic dividend. The 'Opinions on Further Unleashing Consumption Potential and Promoting Consumption Sustained Recovery' issued by the State Council in 2022 proposes to 'guide market players to develop more safe and healthy domestic infant and child products'. According to the National Bureau of Statistics, China's birth rate in 2022 will be 6.77%, and the birth population will be 9.56 million. According to the results of the seventh national census in 2021, the number of infants aged 0-6 in China reached 140 million, of which the number of infants aged 3-6 exceeded 70 million. The huge population size has brewed a market demand with huge potential, and the children's economy has risen rapidly. Chinese families also spend a lot on childcare, with the average cost of childcare ranking second in the world. According to survey data released by the China Children's Industry Research Center, children's expenditure accounts for 30% to 50% of household expenditure in 80% of Chinese families, and the average annual consumption of children in a family is 17,000 to 25,500 yuan.

1 SCOPE OF THE REPORT

1.1 Market Introduction
1.2 Years Considered
1.3 Research Objectives
1.4 Market Research Methodology
1.5 Research Process and Data Source
1.6 Economic Indicators
1.7 Currency Considered
1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global Online Programming Learning Market Size 2019-2030
  2.1.2 Online Programming Learning Market Size CAGR by Region 2019 VS 2023 VS 2030
2.2 Online Programming Learning Segment by Type
  2.2.1 Java
  2.2.2 Python
  2.2.3 C/C++
