Open Array Marine Radar is a radar system widely used in ship navigation and maritime safety. Its key feature is that the antenna is designed as an open array (Open Array), usually a long rod-shaped structure, which provides higher directivity and detection accuracy. Compared with closed radar, open array radar has stronger power, higher resolution and longer detection range, so it is suitable for scenarios that require high-precision navigation such as large yachts, commercial ships and fishing boats.

The global Open Array Marine Radar market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
