Low-value surgical consumables refer to disposable medical products used during surgical procedures that have relatively low individual cost but are crucial for maintaining hygiene, preventing infections, and ensuring patient safety. These consumables are intended for single-use and are typically discarded after each procedure.

The Operating Room Low-Value Consumables market is driven by the crucial role these disposable medical products play in maintaining a sterile and efficient surgical environment. Essential items such as disposable drapes, gloves, gowns, and surgical masks contribute to infection control, ensuring patient safety and preventing cross-contamination. The demand for cost-effective solutions that streamline operating room procedures fuels market growth, reducing the complexity of sterilization processes. Continuous advancements in materials and design enhance the functionality of low-value consumables, meeting the evolving needs of surgical teams.
