The global Optical Fiber Laser Optical Cable (QBH) market size is predicted to grow from US\$ 156 million in 2025 to US\$ 214 million in 2032; it is expected to grow at a CAGR of 4.7% from 2026 to 2032.

Optical Fiber Laser Optical Cable (QBH) is an industry-standard high-power laser transmission interface manufactured using cladding optical stripping technology and quartz end cap fusion splicing technology. It features a compact design, can withstand high laser power, has low transmission loss, and provides a safety interlocking function. Upstream components include high-power fiber laser technology and materials, such as large-core double-clad active/passive fibers, high-purity quartz end caps and quartz blocks, cladding optical strippers, AR coating materials, water-cooled cavities, and precision connectors. Downstream components connect various laser processing heads and complete equipment systems. In 2024, global sales of Optical Fiber Laser Optical Cable (QBH) were approximately 772,000 units, with an average market price of approximately US\$200 per unit and an industry gross profit margin between 20% and 30%.

Optical Fiber Laser Optical Cables

(QBH) are designed for high-power lasers, enabling stable and efficient beam transmission. Their key features include high power carrying capacity, reliable connection performance, and ease of installation and maintenance.

The increasing demand for high-precision cutting, welding, cleaning, and cladding processes in industries such as manufacturing, communications, and healthcare provides a strong market demand for multi-kilowatt fiber lasers and their beam

transmission components.
