Oral glutathione supplements are dietary products designed to increase the body's levels of glutathione, a powerful antioxidant naturally produced by cells. Glutathione plays a critical role in neutralizing free radicals, detoxifying harmful substances, and supporting immune function. These supplements typically contain reduced glutathione or its precursors, such as N-acetylcysteine (NAC) or L-glutamine, to enhance absorption and bioavailability. While widely used for promoting skin health, reducing oxidative stress, and supporting liver function, the effectiveness of oral glutathione supplementation remains a topic of scientific debate due to its limited absorption in the gastrointestinal tract. Advanced formulations, such as liposomal glutathione, aim to improve delivery and efficacy.
