Organic Prebiotic Fiber refers to certified organic dietary fibers that selectively support beneficial gut microbiota and digestive health. It is used in functional foods, beverages, supplements, infant nutrition, and clean-label formulations requiring natural sourcing and gut health positioning.

The industrial chain includes upstream organic crops, roots, grains, extraction solvents, enzymes, and drying equipment. Midstream covers extraction, purification, concentration, drying, milling, blending, and testing. Downstream applications mainly include supplements, functional foods, beverages, dairy alternatives, infant nutrition, and health-focused ingredients.

Rising consumer health awareness and demand for functional food and daily chemical products boost the development of organic prebiotic fiber. It can regulate intestinal microecology and improve nutritional absorption, widely used in food, beverage and

personal care fields. Clean raw material preparation and functional formula optimization further expand its market application scope.
