The global Orthopedic Braces & Support Casting & Splints market size is predicted to grow from US\$ 5353 million in 2025 to US\$ 7424 million in 2031; it is expected to grow at a CAGR of 5.6% from 2025 to 2031.

Orthopedic braces are medical devices designed to address musculoskeletal issues; they are used to properly align, correct the position, support, stabilize, and protect certain parts of the body (particularly the muscles, joints, and bones) as they heal from injury or trauma. These medical devices are often prescribed for the patient to wear during the process of recovery and rehabilitation. An orthopedic cast, or simply cast, is a shell, frequently made from plaster or fiberglass, encasing a limb (or, in some cases, large portions of the body) to stabilize and hold anatomical structures, most often a broken bone (or bones), in place until healing is confirmed. It is similar in function to a splint. A splint is a device used for support or immobilization of a limb or the spine. It can be used in multiple situations, including temporary immobilization of potentially broken bones or damaged joints and support for joints during activity.

The increasing prevalence of musculoskeletal disorders, such as arthritis, osteoporosis, and sports-related injuries, is a major driver of the orthopedic braces, support casting, and splints market. With an aging population and the growing number of individuals engaging in physical activities, the demand for orthopedic devices to treat joint, ligament, and bone injuries has surged. Additionally, advancements in materials, such as lightweight and breathable fabrics, and customizable designs are making these products more comfortable and effective, further driving market growth.

A key challenge in the orthopedic braces and support casting market is the high cost of advanced devices, which can limit access, particularly in low- and middle-income regions. Custom-made braces or splints often require specialized fitting and regular adjustments, which adds to the overall expense. Additionally, limited awareness about the importance of proper rehabilitation and the misuse of braces or splints can lead to delayed recovery or further complications, posing another barrier to optimal market growth.

Global Orthopedic Braces & Support Casting & Splints key players include Enovis, Ottobock, Ossur, 3M Company, Bauerfeind, etc. Global top five retailers hold a share about 35%. North America is the largest market, with a share about 35%, followed by Europe and Asia-Pacific, both have a share over 50 percent. In terms of production, Splinting Supplies is the largest segment, with a share over 53%. And in terms of Application, the largest segment is Retail Pharmacies, followed by Hospital, Online Sales, etc.
