According to our LPI (LP Information) latest study, the global OTC Medicine market size was valued at US\$ 25220 million in 2023. With growing demand in downstream market, the OTC Medicine is forecast to a readjusted size of US\$ 35680 million by 2030 with a CAGR of 5.1% during review period.

The research report highlights the growth potential of the global OTC Medicine market. OTC Medicine are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of OTC Medicine. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the OTC Medicine market.

OTC medicines are also called over-the-counter drugs, as opposed to prescription drugs, which refer to drugs that can be purchased from pharmacies without a doctor's prescription. These drugs have been used for a long time in clinical practice, with definite efficacy and fewer adverse drug reactions. Patients do not need to have too much professional knowledge, and they can use them safely with only the drug instructions and labels.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of

chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs. However, the industry also faces challenges such as stringent regulations, high costs of research and development, and patent expirations. Companies need to continuously innovate and adapt to these challenges to stay competitive in the market and ensure their products reach patients in need. Additionally, the COVID-19 pandemic has highlighted the importance of vaccine development and supply chain management, further emphasizing the need for pharmaceutical companies to be agile and responsive to emerging public health needs.
