Abstracts

The global OTC Topical Itch Relief market size is predicted to grow from US\$ 152 million in 2025 to US\$ 196 million in 2032; it is expected to grow at a CAGR of 3.7% from 2026 to 2032.

OTC Topical Itch Relief help to relieve itchy skin from bug bites, rashes & other minor skin irritations on the go.

Fungal infections are caused by various types of fungi and can occur on the skin, nails or hair. These infections are common health problems worldwide and can range from mild to severe. In the past few years, the prevalence of fungal infections is increasing due to factors such as environmental conditions and poor sanitation. Fungi thrive in warm, humid environments, and public facilities such as public swimming pools, changing rooms, and saunas increase the risk of infection. Due to the sub-health state and the weakening of body resistance, the scope of skin disease infection is expanding day by day. The elderly, children, young people, and adults all have skin diseases more or less, and they cannot be cured. The itching will always accompany, which also makes over-the-counter Anti-itch products saw growth.
