Outdoor Heater, also called Patio Heater, (also called a mushroom or umbrella heater) is an appliance for generating radiant heat for outdoor use.

A burner on top of a post, burns liquefied petroleum gas (LPG), propane or butane, and directs the flames against a perforated metal screen. Heat is radiated from the surface of the screen in a circular pattern around the appliance. A reflector atop the burner reflects heat that would be otherwise lost upwards. This is because the reflecting hood is usually silvered which makes it a poor absorber/emitter of heat but excellent at reflecting infra-red radiation back. This reduces the amount of heat lost by conduction as silvered surfaces will not absorb infra-red light.

In United States, the key Outdoor Heating manufacturers are Infrared Dynamics, Garden Sun, Fire Sense, Sunheat International, AZ Patio Heaters, Blue Rhino, Lava

Heat Italia, Bronic Heating etc.
