The global Overhead Cranes market size is predicted to grow from US\$ 5965 million in 2025 to US\$ 7204 million in 2031; it is expected to grow at a CAGR of 3.2% from 2025 to 2031.

Overhead Cranes is a type of crane found in industrial environments. An overhead crane consists of parallel runways with a traveling bridge spanning the gap. A hoist, the lifting component of a crane, travels along the bridge. If the bridge is rigidly supported on two or more legs running on a fixed rail at ground level, the crane is called a gantry crane (USA, ASME B30 series) or a goliath crane (UK, BS 466).

There are six core manufacturers of overhead cranes, including Konecranes, Kito Group, ABUS, Weihua, GH Crane & Components, and Jinrui, among which Konecranes accounts for the largest market share, accounting for about 16%. In terms of type, Single-girder Overhead Cranes account for the largest proportion, about 71%. Regionally, the Asia-Pacific region accounts for the largest share of the global market share, at around 41%. From an application point of view, Factory & Plant account for the largest share, accounting for more than 38% of the market share.
