The global Overhead Power and Free Conveyor Systems market size is predicted to grow from US$ 1216 million in 2025 to US$ 1803 million in 2032; it is expected to grow at a CAGR of 5.9% from 2026 to 2032.

Overhead Power & Free Conveyors have free trolleys that are driven by power chains and carriers that transport the material to a given location. The carriers are attached to the free trolleys and are normally engaged to the power chain by an attached pusher dog assembly on the free trolley. The pusher dog can be disengaged by a cam action in either the free trolley or the chain dog, caused by accumulating behind another free trolley or by engaging a stop blade. The chain continues to move while the carrier becomes temporarily stationary until the free trolley becomes re-engaged with the chain.
