The global Overhead Sink market size is predicted to grow from US\$ 5096 million in 2025 to US\$ 6877 million in 2032; it is expected to grow at a CAGR of 4.5% from 2026 to 2032.

A top-mounted sink is a sink installed above the countertop. Compared with the traditional recessed sink, it is not embedded in the countertop, but placed above the countertop, usually consisting of an independent sink and bracket. The design of the overhead sink makes it more prominent in the kitchen and washroom, and can be one of the highlights of the interior design. This type of sink is suitable for different types of countertop materials, such as quartz stone, marble, artificial stone, etc., so it allows some flexibility in design. With people's pursuit of personalization and uniqueness, overmount sinks may provide more design options to meet the needs of different consumers.
