## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Open-back headphones refer to a type of headphones that use open-back headphones that are not worn in the ear and do not block or cover the ears. Compared with traditional closed-back or semi-closed-back headphones, open-back headphones have excellent comfort and openness. The listening effect is excellent, and therefore it has become the hottest headphone product at present. The advantage of open-back headphones comes from the open design of the headphones, which allows the wearer to hear some external sounds, such as environmental noise, other people talking, etc. This design allows the wearer to enjoy music without completely isolating external sounds. In addition, open-back headphones also have better breathability, are more comfortable to wear, and are suitable for long-term use.

The global OWS Open Ear Headphones market size is projected to grow from US\$ 2173 million in 2024 to US\$ 3576 million in 2030; it is expected to grow at a CAGR of 8.7% from 2024 to 2030.
