The global Oxidising Biocides market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Oxidising Biocides are a class of chemical substances with oxidizing effects that can kill or inhibit the growth of microorganisms by releasing oxidants. They destroy the cell structure of microorganisms by producing free radicals or other oxidizing substances, thereby achieving the purpose of killing microorganisms. When using oxidising Biocides, it is necessary to pay attention to their impact on the environment and the possible corrosion to materials. At the same time, long-term use of the same oxidizing fungicide may cause microorganisms to develop resistance, so it is necessary to reasonably rotate the use of different types of fungicides.

United States market for Oxidising Biocides is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Oxidising Biocides is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
