According to this study, the global Ozone Generation Technology market size will reach US\$ 24 million by 2030.

Ozone generators work by combining oxygen (O2) with energy to produce ozone (O3). When the oxygen molecules are exposed to energy, the two atoms are broken apart. The single oxygen atoms quickly bond in groups of three to form ozone.

In the report, we mainly focused on the electrolytic ozone generators.

Suez, De Nora Permelec Ltd and BWT Pharma & Biotech are the top 3 players of Ozone Generation Technology, with about 56% market shares.

This report presents a comprehensive overview, market shares, and growth opportunities of Ozone Generation Technology market by product type, application, key players and key regions and countries.
