Palletizing adhesive is a sprayable, synthetic elastomer-based adhesive for bonding a variety of lightweight materials such as felt, cork, cardboard, paper, wood, plastic wrap and other common materials used in shipping and packaging. This adhesive sprays easily when palletizing everyday products such as salt, pet food, much and more. Palletizing Adhesive is ideally suited for bonding lightweight materials and applying a temporary hold during the assembly of pallets for plastic shipping bags, holding them in place during shipping and storage. Bags can then be palletized quickly and handled immediately. This special adhesive holds bags in place and, when unstacking, bags should separate easily with no tearing.
