The global Palm Kernel Oil Diethanolamide market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Palm kernel oil diethanolamide is a non-ionic surfactant with no cloud point. It is a viscous liquid with a light yellow to amber color, easily soluble in water, and has good foaming, foam stabilization, penetration and stain removal, and resistance to hard water. When anionic surfactants are acidic, their thickening effect is particularly significant when combined with them, and they can be combined with various surfactants. It can enhance the cleaning effect, and can be used as an additive, foam stabilizer, foam aid, mainly for the manufacture of shampoo and liquid detergent. Forming an opaque mist like solution in water, it can be completely transparent under certain stirring, and can be completely dissolved in different types of surfactants at a certain concentration. It can also be completely dissolved in low and high carbon environments.
