The global Panel Saw market size is predicted to grow from US\$ 652 million in 2025 to US\$ 702 million in 2031; it is expected to grow at a CAGR of 1.2% from 2025 to 2031.

Panel saw is a machine with a sliding table which is used to cut large sheet materials into smaller rectangular sections and pieces, often as part of an initial sizing process. It consists of a circular saw and an upright framework that supports the work piece and a track that the circular saw travels along. Unlike a table saw where the work piece is moved past the cutting blade, with a panel saw the operator moves the circular saw across the work piece, with the work piece fixed in place.

The major players in global Panel Saw market include HOMAG, Schelling, Altendorf, etc. The top 3 players occupy about 20% shares of the global market. Europe and China are main markets, they occupy about 70% of the global market. Sliding Table Saw is the main type, with a share about 75%. Panel Furniture is the main application, which holds a share about 55%.
