The Partially Enclosed Lifeboat (PELB) ensures the safety and protection of your personnel and passengers. The boat can be launched by various davits with high stability. Partially enclosed lifeboats are lighter than a fully enclosed version, which means they can be suspended and lowered from a lighter davit, thus saving space and being more economically attractive. Semi-enclosed lifeboats are also easier to access in an emergency. The sides of the lifeboat are made up of a number of collapsible canopies that can be closed when the boat is in the water.
