A pastry blender is a kitchen appliance used to stir, mix and beat pastry ingredients. It is commonly used in pastry-type foods such as batters, doughs and cakes. Pastry blenders are increasingly multi-functional and can perform functions such as whipping egg whites, whipping cream, and kneading dough in addition to stirring and mixing functions. This design makes the pastry blender more flexible and multi-purpose, meeting the needs of different pastry making. As the smart home evolves, pastry blenders are also starting to incorporate smart technology. For example, equipped with a smart control panel and preset programs, it can automatically adjust the stirring speed and time according to the needs of different recipes.
