Abstracts

The global PCB Decontamination Service market size is predicted to grow from US$ 513 million in 2025 to US$ 757 million in 2032; it is expected to grow at a CAGR of 5.8% from 2026 to 2032.

PCB Decontamination Service refers to professional testing, cleaning, disposal, and environmental remediation services for power equipment, industrial facilities, soil, building materials, and related waste contaminated with polychlorinated biphenyls (PCBs). This service typically includes pollution source identification and assessment, PCB content testing and analysis, equipment drainage and dismantling, chemical dechlorination, high-temperature incineration, surface decontamination, hazardous waste transportation, and contaminated site remediation, aiming to reduce PCB concentrations to levels complying with national or international environmental regulations. Due to the persistent organic pollutant (POPs) nature of PCBs, with their high toxicity, bioaccumulation, and long-term environmental residue risks, the decontamination process must strictly adhere to environmental, safety, and hazardous waste management standards. PCB decontamination services are widely used in the remediation of transformers, capacitors, power systems, chemical plants, metallurgical facilities, and historically contaminated sites, and are an important professional environmental service for achieving environmental risk control, compliant equipment disposal, and ecological restoration.

The global PCB decontamination service market is primarily driven by the Stockholm Convention, showing steady growth overall. North America and Europe, having earlier implemented PCB equipment decommissioning and contaminated site remediation, have relatively mature markets, with demand concentrated on decommissioning aging power facilities, remediating contaminated soil, and long-term environmental monitoring.

The Asia-Pacific region is experiencing the fastest growth due to power grid upgrades, industrial facility renovations, and increasingly stringent environmental regulations. Latin America, the Middle East, and Africa are in the stage of regulatory refinement and accelerated infrastructure remediation, with market potential gradually being realized. Current industry services have expanded from simple hazardous waste disposal to testing and assessment, transportation management, equipment decontamination, site remediation, and full lifecycle compliance services. Future development trends include the promotion of digital pollution monitoring, mobile on-site treatment equipment, low-carbon decontamination processes, bioremediation technologies, and integrated environmental governance solutions. Major obstacles to industry development include restrictions on cross-border hazardous waste transportation, long project approval cycles, high treatment costs, a shortage of skilled personnel, and insufficient enforcement of environmental regulations in some regions. Meanwhile, the continued implementation of PCB inventory clearance programs, contaminated site redevelopment, and power equipment upgrades in various countries will generate long-term demand for the industry. Overall, PCB decontamination services belong to the technology and compliance-driven environmental service industry. The industry's average gross profit margin is usually between 25% and 40%, with larger comprehensive treatment projects and high-tech services having relatively higher gross profit margins.

LPI (LP Information)' newest research report, the ?PCB Decontamination Service Industry Forecast? looks at past sales and reviews total world PCB Decontamination Service sales in 2025, providing a comprehensive analysis by region and market sector of projected PCB Decontamination Service sales for 2026 through 2032. With PCB Decontamination Service sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world PCB Decontamination Service industry.

This Insight Report provides a comprehensive analysis of the global PCB Decontamination Service landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyses the strategies of leading global companies with a focus on PCB Decontamination Service portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms? unique position in an accelerating global PCB Decontamination Service market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for PCB Decontamination Service and breaks down the

forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global PCB Decontamination Service.

This report presents a comprehensive overview, market shares, and growth opportunities of PCB Decontamination Service market by product type, application, key players and key regions and countries.

Segmentation by Type:

Chemical Dechlorination

Solvent Flushing

Thermal Desorption

Others

Segmentation by Concentration Level:

>5,000 ppm PCB

500?5,000 ppm PCB

50?500 ppm PCB

Contents

1 SCOPE OF THE REPORT

1.1 Market Introduction
1.2 Years Considered
1.3 Research Objectives
1.4 Market Research Methodology
1.5 Research Process and Data Source
1.6 Economic Indicators
1.7 Currency Considered
1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global PCB Decontamination Service Market Size (2021-2032)
  2.1.2 PCB Decontamination Service Market Size CAGR by Region (2021 VS 2025 VS 2032)
  2.1.3 World Current & Future Analysis for PCB Decontamination Service by Country/Region (2021, 2025 & 2032)
2.2 PCB Decontamination Service Segment by Type
  2.2.1 Chemical Dechlorination
  2.2.2 Solvent Flushing
  2.2.3 Thermal Desorption
  2.2.4 Others
  2.2.5 PCB Decontamination Service Market Size by Type
    2.2.5.1 PCB Decontamination Service Market Size CAGR by Type (2021 VS 2025 VS 2032)
    2.2.5.2 Global PCB Decontamination Service Market Size Market Share by Type (2021-2026)
2.3 PCB Decontamination Service Segment by Concentration Level
  2.3.1 >5,000 ppm PCB
  2.3.2 500?5,000 ppm PCB
  2.3.3 50?500 ppm PCB
  2.3.4
