PCD diamond saw blade is a cutting tool widely used in the processing of hard and brittle materials such as concrete, refractory materials, stone, ceramics and wood boards. It mainly consists of two parts: the base and the cutter head. The base: is the main supporting part of the bonded cutter head and will not be consumed during use. The cutter head: is the part that plays a cutting role and contains diamond particles. These particles are wrapped in metal inside the cutter head and are continuously consumed during use. PCD diamond, as the hardest substance currently available, can frictionally cut the processed object in the cutter head. PCD diamond saw blades have a variety of process classifications, such as sintered diamond saw blades (cold pressing sintering and hot pressing sintering), welded diamond saw blades (brazing and laser welding) and electroplated (brazing) diamond saw blades. The technology of PCD diamond saw blades continues to improve, including the optimization of blade materials, the improvement of cutting efficiency and the enhancement of durability. These technological advances have enabled PCD diamond saw blades to be widely used in more fields and improved their market competitiveness.

The research and development and application of new materials, such as different types of diamond coatings and improvements in base materials, have also improved the performance of PCD diamond saw blades. With the rapid development of global and Chinese infrastructure construction, the demand for PCD diamond saw blades continues to grow. Especially in emerging markets such as China and India, the accelerated urbanization process has promoted the demand for building materials, which in turn has driven the market demand for PCD diamond saw blades. The rapid development of the building materials industry, stone processing, metal cutting and

other fields has also promoted the growth of the PCD diamond saw blade market.

There are many internationally renowned brands in the PCD diamond saw blade market, which have competitive advantages in technology, brand influence, etc. At the same time, there are also many local brands in the market, which enhance their competitiveness through technological innovation, improving product quality and optimizing services. The main global PCD diamond saw blade manufacturers include LEUCOM, Stanley Black and Decker (Lenox), Bosch, EHWA, AT&M, Jiangsu Fengtai Tools, Makita, etc. The top five global manufacturers account for about 20% of the market share. Asia Pacific is currently the world's largest PCD diamond saw blade consumer market, accounting for more than 52% of the market share, followed by North America and Europe, which together account for more than 42% of the market share.
