PDT Digital Explosion-Proof Intercom is a digital intercom that adopts the PDT (Professional Digital Trunking) format. It has explosion-proof function and can be used in dangerous environments such as explosive gas. It adopts 12.5kHz TDMA dual time slot, 4FSK modulation, and digital voice compression technology, taking into account the needs of users at different levels and the actual needs of network construction. It supports low-cost single base station system communication and can also achieve efficient large-area coverage. Its explosion-proof characteristics are achieved by improving circuit design, battery solutions, and anti-static properties of the body material, which suppresses the generation of electric sparks and ensures communication safety in dangerous environments.
