Pea milk is extracted from yellow peas and constitute same amount of protein as delivered by cow milk and way more than that present in almond milk. Milk extracted from peas is cost effective, produces a clean taste and does not delivers strong flavor as other plant based milk available in the market.

The food market includes both fresh and processed foods. According to our research, the global food and beverage market has a sales revenue of approximately US\$10 trillion. China is the world's number one food and beverage market and the world's number one food and beverage producer. In the market drivers section, the total consumer spending forecast shows that consumption at home is growing faster than consumption away from home. However, food service continues to become increasingly important due to changing lifestyles.
