## Abstracts

The global Pebax Heat Shrink Tubing market size is predicted to grow from US$ 5.95 million in 2025 to US$ 9.01 million in 2032; it is expected to grow at a CAGR of 6.2% from 2026 to 2032.

Pebax heat shrink tubing, made primarily from Pebax® (polyether block amide), combines the strength of polyamide with the flexibility of polyether, offering excellent flexibility, abrasion resistance, low-temperature resistance, and biocompatibility. Compared to common polyolefin and fluoroplastic heat-shrink tubing, Pebax heat-shrink tubing is more suitable for high-end medical applications. Global production in 2024 was expected to be approximately 773,000 meters, with an average selling price of US$7.50 per meter.

Pebax® (polyether block polyamide) is a thermoplastic elastomer developed by Arkema, France. A block copolymer composed of polyamide hard segments and polyether soft segments, it combines the toughness of polyamide with the flexibility of polyether, while also offering ultra-lightweight, high resilience, high strength, and low-temperature resistance. Due to the concentrated supply chain, prices are controlled by international chemical giants. With the rapid development of interventional medicine and minimally invasive surgery worldwide, demand for Pebax heat shrink tubing has shown a steady upward trend.

United States market for Pebax Heat Shrink Tubing is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
