Abstracts

The global PEEK Screws and Fasteners market size is predicted to grow from US$ 184 million in 2025 to US$ 309 million in 2032; it is expected to grow at a CAGR of 7.7% from 2026 to 2032.

PEEK Screws and Fasteners are high-performance engineering plastic fastening components manufactured from PEEK or reinforced and filled materials in which PEEK remains the principal polymer matrix. They are designed for mechanical joining, fixation, positioning, load transfer, or electrical insulation in demanding operating environments. Major product forms include PEEK screws, bolts, nuts, washers, studs, threaded rods, and threaded standoffs. These fasteners may be manufactured from unfilled PEEK, glass fiber-reinforced PEEK, carbon fiber-reinforced PEEK, or other specialty filled PEEK grades and are supplied in metric, imperial, ISO, DIN, JIS, or customer-specific dimensions. Owing to their high-temperature resistance, chemical and hydrolysis resistance, electrical insulation, low outgassing, lightweight characteristics, and strong mechanical performance, PEEK fasteners are widely used in semiconductor and electronics equipment, aerospace and defense systems, chemical and energy equipment, medical and laboratory equipment, automotive and new-energy systems, and industrial machinery operating under high-temperature, corrosive, or electrically insulating conditions. The market covers finished PEEK fasteners supplied as independently saleable components and excludes upstream PEEK resin, compounds, rods, plates, and other semi-finished materials, as well as PEEK seals, bearings, bushings, gears, and other functionally different PEEK components.

United States market for PEEK Screws and Fasteners is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
