Abstracts

The global PEEK Sealing Components market size is predicted to grow from US$ 259 million in 2025 to US$ 406 million in 2032; it is expected to grow at a CAGR of 6.7% from 2026 to 2032.

PEEK Sealing Components are high-performance engineering plastic sealing parts manufactured from Polyether Ether Ketone (PEEK) or reinforced, filled, and tribologically modified materials in which PEEK remains the principal polymer matrix. They are designed to provide sealing, anti-extrusion, supporting, guiding, and leakage-control functions under demanding operating conditions such as high temperature, high pressure, corrosive media, vacuum, and severe wear. Major product forms include PEEK back-up rings, anti-extrusion rings, seal rings, sealing gaskets, PEEK sealing elements used in spring-energized seals, and other customized PEEK sealing components. Materials may include unfilled PEEK, glass fiber-reinforced PEEK, carbon fiber-reinforced PEEK, and other filled or wear-resistant PEEK grades. Typical applications include oil and gas downhole tools and HPHT equipment, pumps, valves and compressors, chemical and industrial fluid-control systems, semiconductor vacuum and wet-process equipment, aerospace hydraulic and fuel systems, automotive and new-energy equipment, and medical and pharmaceutical equipment. The market covers finished PEEK sealing components supplied as independently saleable products and excludes upstream PEEK resin, compounds, rods, plates and other semi-finished materials, as well as non-PEEK seals, PEEK bearings, bushings, gears, fasteners, and other functionally different PEEK components.

United States market for PEEK Sealing Components is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
