Peel ply fabrics are an extra layer of fabric material, which is used over an epoxy coated surface. Peel ply fabrics are used with releasing agents. They provide a smooth surface and reduce subsequent sanding required during epoxy coating. These peel ply fabrics can be easily peeled off once they are cured, thereby providing a smooth surface with superior adhesion. Peel ply fabrics does not stretch and thus, can be useful on flat surfaces. These fabrics prevent foreign materials from becoming sticking to the finished parts. Peel ply fabrics plays a vital role in the building & construction industry, as it allows the user to build a re-bondable surface once the peel ply is removed.
