The global Peptide Conjugation Services market size is predicted to grow from US\$ 135 million in 2025 to US\$ 202 million in 2032; it is expected to grow at a CAGR of 5.8% from 2026 to 2032.

Peptide Conjugation Services are customized life-science and biopharmaceutical services that covalently or site-selectively link peptides with other molecules, such as carrier proteins, antibodies, fluorescent dyes, biotin, PEG linkers, oligonucleotides, small-molecule drugs, toxins, nanoparticles, or surfaces, to improve targeting, stability, detection, immunogenicity, assay performance, or drug-delivery functions.

The industry is growing with rising demand for peptide-drug conjugates, targeted delivery systems, peptide vaccines, antibody generation, diagnostic assays, fluorescent/biotin-labeled peptides, PEGylated peptides, and customized research tools; opportunities are strongest in oncology, immunology, molecular diagnostics, drug discovery, and outsourced CDMO services, while challenges include conjugation-site control, purity, batch consistency, linker stability, analytical validation, scale-up difficulty, GMP compliance, high technical labor cost, and competition from broader bioconjugation service providers.
