The global Perfluorooctanesulfonic Acid market size is predicted to grow from US\$ 221 million in 2025 to US\$ 290 million in 2032; it is expected to grow at a CAGR of 3.9% from 2026 to 2032.

Perfluorooctanesulfonic Acid (PFOS) is a fully fluorinated sulfonic acid ($C_8F_{17}SO_3H$) belonging to the broader class of per- and polyfluoroalkyl substances (PFAS), characterized by exceptional chemical stability, thermal resistance, and strong surfactant properties due to its hydrophobic fluorocarbon tail and hydrophilic sulfonic acid head; it was historically used in applications such as firefighting foams, metal plating, semiconductor processing, and stain-resistant coatings, but is now heavily restricted globally because of its persistence, bioaccumulation, and toxicity. The supply chain begins upstream with fluorochemical raw materials (e.g., fluorspar & hydrogen fluoride & fluorinated intermediates), followed by electrochemical fluorination (ECF) or related processes to produce perfluorooctanesulfonyl fluoride (POSF), which is then hydrolyzed to PFOS or converted into downstream derivatives; midstream involves formulation into surfactants, wetting agents, or specialty chemicals for industrial use; downstream sectors historically included aerospace, electronics, textiles, and fire protection, but today the market is largely limited to tightly controlled exemptions and environmental remediation activities, with supply dominated by legacy producers and a shift toward safer PFAS alternatives due to regulations such as the Stockholm Convention on Persistent Organic Pollutants. In 2025, global Perfluorooctanesulfonic Acid output was about 22,000 tons with 26,000 tons of capacity, average prices of USD 8,000-15,000 per ton, and gross margins around 21%.

United States market for Perfluorooctanesulfonic Acid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Perfluorooctanesulfonic Acid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
