Perforated Calcium Silicate Board is a highly versatile material for decoration and construction. Thin boards are ideal for ceiling applications, with perforations that enhance sound absorption. Standard boards can be used for walls, decorative materials, indoor partition walls (such as bathroom dividers), curtain wall backing, composite wall panels, outdoor billboards, insulation for metallurgical and electric furnaces, switch cabinets, and transformer partitions. Thicker boards serve as LOFT steel structure flooring, attic boards, exterior wall insulation boards, and cladding panels. Compared to regular calcium silicate boards, perforated calcium silicate boards provide superior acoustic performance, making them suitable for areas that require enhanced sound control.
