The permanent ferrite magnetic tile is a ferrite magnetic tile with a permanent magnet state. The magnetic properties of the permanent ferrite magnetic tile show high magnetic permeability at high frequencies. Therefore, ferrite has become a high-frequency weak current magnet. Non-metallic magnetic materials with a wide range of applications in the field, due to the low magnetic energy stored in the unit volume of

ferrite, the saturation magnetization is also low (usually only 1/3-1/5 of pure iron), which limits its application in the field of demand. Higher magnetic energy density generation frequency strong current and high power applications, in the magnetic field forming particles are easy to turn, so it can obtain a higher degree of orientation than dry pressing, and its performance is also higher, it is widely used in various high performance motor
