Permanent Magnetic Lifters are mainly used to lift steel plates, blocks, press molds etc. In loading and unloading, the lifter can hoist iron/steel blocks, cylinders and others onto magnetic materials for linkage or connection. It is very convenient for application in loading, unloading, and moving. Permanent Magnetic Lifters are the most ideal lifting facility for factories, docks, warehouses and transportation.

Increased demand from various industries: Permanent magnetic lifters are used in various industries such as automotive, manufacturing, logistics, and more. The growth of these industries is driving the demand for permanent magnetic lifters. As these industries expand, the need for efficient and reliable lifting solutions increases, providing opportunities for the permanent magnetic lifter market to grow.

Improved lifting capacity and performance: Permanent magnetic lifters have improved lifting capacity and performance compared to traditional lifting methods. This allows them to handle larger and heavier loads, which cannot be easily lifted using conventional lifting equipment. The development of more powerful permanent magnetic lifters has opened up new application areas and markets, further fueling market growth.
