## Abstracts

The global Peroxy Acid market size is predicted to grow from US\$ 2287 million in 2025 to US\$ 3208 million in 2032; it is expected to grow at a CAGR of 5.0% from 2026 to 2032.

Peroxy acids are a class of strong oxidizing chemicals characterized by the presence of a peroxide bond ( $\text{O-O}$ ) within a carboxylic acid structure (general formula  $\text{R-CO-OOH}$ ), with common examples including peracetic acid and peroxyformic acid. They are widely used as disinfectants, bleaching agents, polymerization initiators, and oxidation reagents in industries such as food processing, healthcare sterilization, pulp & paper, textiles, and chemical synthesis. The supply chain of peroxy acids typically begins upstream with key raw materials such as hydrogen peroxide, organic acids (e.g., acetic acid), and catalysts; these inputs are supplied by large chemical producers. In the midstream, specialty chemical manufacturers produce peroxy acids through controlled reaction processes (often equilibrium reactions between hydrogen peroxide and the corresponding acid), followed by stabilization, formulation, and packaging due to their inherent instability and safety requirements. Downstream, the products are distributed via chemical distributors or directly to end users including food & beverage processors, water treatment facilities, hospitals, and industrial manufacturers, with logistics emphasizing safe handling, temperature control, and compliance with hazardous chemical regulations. In 2025, global Peroxy Acid output was about 1.7 million tons with 2.2 million tons of capacity, average prices of USD 1,200-2,000 per ton, and gross margins around 26%.

United States market for Peroxy Acid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Peroxy Acid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Peroxy Acid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
