The Personalized Learning AI System is an intelligent system that provides customized educational pathways for each learner by deeply applying AI technologies such as machine learning, knowledge graphs, and natural language processing. Its core lies in dynamically collecting learners' knowledge mastery, cognitive preferences, and behavioral data to construct multi-dimensional user profiles, and then adjusting teaching content, difficulty, and pace in real time based on this data. The system can intelligently recommend differentiated learning resources, achieve adaptive practice and precise Q&A, and predict learners' potential difficulties. It aims to break through the traditional one-size-fits-all teaching model, significantly improving learning efficiency and engagement through intelligent, individualized instruction, and driving the paradigm shift in education from teacher-centered to learner-centered approaches.
