The global PET BCF Carpet Yarns market size is predicted to grow from US\$ 88.7 million in 2025 to US\$ 130 million in 2032; it is expected to grow at a CAGR of 5.7% from 2026 to 2032.

BCF yarn is also called continuous bulked filament yarn, and is mainly used in various types of carpets downstream.

PET BCF yarn, also called polyester BCF yarn, is a type of BCF yarn. It is a continuous bulked filament yarn made through specific production processes, such as spinning (the melt is ejected through a spinneret to form filaments.), stretching and deformation (stretching and deforming the filaments to give them a curled shape and the required physical properties.), and winding (winding the deformed yarn into a specified shape and length.) The main advantages of polyester BCF yarn are durability, stain resistance, and favorable prices. It is often used in residential and commercial carpets. Polyester yarn carpets are valued for their softness, elasticity, and ability to maintain their appearance for a long time. In addition, PET yarn is environmentally friendly because it can be made from recycled materials, making it a sustainable choice for carpet manufacturing.

The fundamental difference between polyester BCF yarn and ordinary yarn lies in the fineness range, and most BCF is around 700-4000D. In terms of the share of BCF yarn types, there are obvious differences in different regions around the world. Taking the Chinese market as an example, polyester BCF yarn accounts for a large proportion, mainly because of the most favorable price and the feel is close to nylon yarn. The terminal is mainly commercial and residential carpets, and a small part is used for car carpets. In the European and American markets, nylon BCF yarn is more used. For

example, the Belgian company BIG Yarns expanded its carpet yarn production line in January 2024 and completed the first industrial production of polyester BCF yarn for car carpets, while its other carpet yarn production line is nylon. From the perspective of the global BCF yarn market, although polyester yarn has a great advantage in price, nylon still has the largest share.

The core companies of global polyester BCD yarn are mainly distributed in Asia Pacific (China, India and Japan) and Europe. For example, BIG Yarns, G?lsan Holding, Beekaylon Synthetics, AYM Syntex Limited, KORTEKS, FUJII NENSHI & CO LTD, Suminoe Textile, Jiangsu Lingda Chemical Group, etc.
