The global Pet Cooling & Drying Clothes market size is predicted to grow from US\$ 330 million in 2025 to US\$ 788 million in 2032; it is expected to grow at a CAGR of 13.5% from 2026 to 2032.

In 2024, the global production of pet cooling and drying clothes was estimated at 15-25 million pieces, with an average selling price of approximately \$8-\$25 per piece and a gross profit margin of about 40%. Single-line production capacity was approximately 150,000-300,000 pieces per year. Pet cooling and quick-drying clothing is a multi-functional garment designed specifically for pets. Its core principle is the use of special fiber fabrics (such as microfiber or cooling fibers) with high absorbency and rapid evaporation. Through the evaporation of moisture within the fabric fibers and on the pet's skin, a large amount of body heat is continuously and effectively removed, achieving a physical cooling effect. Its superior absorbency allows for rapid absorption of moisture from the pet's fur, significantly shortening the natural drying time and providing the dual function of cooling the pet in hot weather and quickly drying their fur after bathing, swimming, or rain. Its upstream mainly consists of the chemical and textile industries, responsible for providing core functional fabrics and accessories such as microfiber, cooling gel, or phase change materials; the midstream is the finished product design and manufacturing stage, where pet product brands and manufacturers conduct functional design, cutting and sewing, and complete the production of finished products; the downstream reaches the end consumer through pet product retailers, e-commerce platforms, and pet service agencies. The demand for this product stems directly from pet owners' rigid need for heat protection and safety in hot climates, as well as their strong demand for quick drying of fur after bathing and swimming to improve grooming efficiency and prevent skin problems. At a deeper level, it is driven by the global trend of anthropomorphic pet consumption and the increasing awareness of pet health care.
