The global Pet Digital X-ray Radiography market size is predicted to grow from US\$ 229 million in 2025 to US\$ 326 million in 2032; it is expected to grow at a CAGR of 5.3% from 2026 to 2032.

Pet Digital X-ray Radiography refers to a type of medical imaging technique used to diagnose health conditions in animals, specifically pets such as dogs and cats. This imaging technique is also known as digital radiography or digital X-ray. Digital radiography uses electronic sensors to capture X-ray images of the body, which are then processed and displayed on a computer screen. Compared to traditional film-based X-rays, digital radiography produces higher-quality images with greater detail and contrast. It also requires less radiation exposure for the animal, making it safer and more efficient. Pet digital X-ray radiography can be used to diagnose a variety of conditions in pets, including broken bones, joint abnormalities, lung or heart disease, gastrointestinal issues, and dental problems. The images produced by this technique can help veterinarians to make an accurate diagnosis and develop an appropriate treatment plan for the animal. Digital radiography is becoming increasingly common in veterinary medicine, and many veterinary clinics and animal hospitals now offer this technology for diagnostic imaging of pets.

According to Our PET Supplies Research Center, the global pet industry reached \$ 261 billion in 2022, a year-on-year increase of 11.3%. The United States gains the highest pet penetration rate and becomes the largest pet market. According to the American Pet Products Association (APPA), 66% of American households keep pets, and the total industry sales was about US\$136.8 billion, an increase of 10.8% over 2021. According to IVH, the German pet products industry association, the number of pets in Germany reached 33.4 million in 2022, with a total turnover of nearly €6.5 billion. The 2023 China

Pet Industry Trend Insight White Paper released by JD shows that the market size of the four major pet physical commodities is increasing year by year: pet supplies account for 45%, pet staple food accounts for nearly 35%, pet snacks account for 12%, and pet medicine and health care account for 527%.
